Schools not part of the 2022 administration will not have access to your AAMC PREview scores for the AMCAS 2023 admissions cycle. The AAMC will retain your AAMC PREview score report indefinitely. If you reenter the medical school application process in a future application year, the AAMC will provide your AAMC PREview score report to any program to which you apply that accepts or requires the AAMC PREview exam as part of their application process.

**11. WHAT DOES MY PREview SCORE MEAN?**

The AAMC PREview results in a total score, which reflects your understanding of pre-professionalism and potential to learn and develop pre-professionalism skills. Higher scores reflect a higher level of understanding.

The AAMC collaborated with medical educators, including faculty, admissions officers, and student and diversity affairs officers to develop the scoring key for the PREview (i.e., the key effectiveness rating for each response). Scores are based on the extent to which your effectiveness rating for each response aligns with medical educators' ratings for each response. Full credit is awarded for an item if your response matches the medical educators' rating. Partial credit is awarded if your rating is close to the medical educators' rating.
